

AI Development Capability Assessment

Your roadmap to secure, scalable AI software development adoption.

Overview

We help enterprise teams evaluate their readiness for AI-powered development. This assessment identifies current risks

Key Benefits

- De-risk tool selection and integration
- Project ROI and productivity gains
- Align teams with modern development strategies
- Build an AI-ready security and compliance posture

What's Included

Phase 1: Current State Analysis

- Workflow & process review
- Codebase & tooling audit
- Team capability mapping

Phase 2: Security & Infrastructure Review

- Risk identification
- Infrastructure & platform compatibility
- DevOps & governance maturity

Phase 3: Strategic Roadmap

- AI platform recommendations
- Training paths by role
- Implementation timeline
- ROI projections and KPIs

Engagement Details

Timeline:	2–3 weeks
Output:	40–60 page report + executive summary
Format:	Remote workshops + interviews
Deliverables:	Technical roadmap, training plan, risk matrix
Next Step:	Schedule a 30-minute consultation

“This assessment paid for itself in less than a month.”
